Re: Health Information Management / Coding Position

Dear Hiring Manager,

I am an Associate of Applied Science candidate in Health Information Management at Columbus State Community College and will be taking my RHIT exam this Spring. I am seeking an entry-level HIM or coding role where I can apply my training in ICD-10-CM/PCS and CPT/HCPCS coding, release of information, compliance, and healthcare data analysis.

Through my project-based, virtual practicum with the Ohio Health Information Management Association Virtual Internship Program, I learned and practiced inpatient and outpatient coding, documentation review for accuracy and specificity, HIPAA compliant release of information procedures, and quality improvement reporting using Excel and Access. While this experience was academic rather than employment based, it provided firsthand training in real-world HIM workflows. I am consistently accurate, organized, and dependable in completing assigned tasks.

I would value the opportunity to contribute these skills to your team. Thank you for your time and consideration. I look forward to the opportunity to discuss my qualifications further.

Sincerely,

Suzanna Bolich
