PROFESSIONAL SUMMARY

Health Information Management (HIM) student and RHIT candidate with hands-on training in medical coding, release of information, revenue cycle operations, healthcare compliance, and clinical data analysis. Practicum experience includes assigning ICD-10-CM/PCS and CPT/HCPCS codes, auditing documentation for regulatory accuracy, processing HIPAA-compliant disclosures, and supporting quality improvement initiatives through data review and reporting. Recognized for meticulous attention to detail, accuracy, confidentiality, and dependable performance.

EDUCATION

Associate of Applied Science – Health Information Management Technology (AAS)
Columbus State Community College – Columbus, OH | May 2026
Dean's List – All semesters

CREDENTIALS

Registered Health Information Technician (RHIT) – May 2026

TECHNICAL SKILLS

Coding Systems: ICD-10-CM/PCS, CPT/HCPCS

Tools & Platforms: SQL, Microsoft Access, Excel, Electronic Health Records (EHR/EHR Go), Solventum encoder

OHIMA VIRTUAL INTERNSHIP PROGRAM: PRACTICUM EXPERIENCE

- Reviewed authorizations and applied federal/state disclosure regulations to process HIPAA-compliant Release of Information (ROI) requests while safeguarding protected health information.
- Assigned ICD-10-CM/PCS and CPT/HCPCS codes for inpatient and outpatient encounters, audited documentation for accuracy, sequencing, and compliance and documented coding rationales.
- Evaluated provider documentation for completeness and specificity to support Clinical Documentation Improvement (CDI) and reimbursement integrity.
- Developed Excel charts to analyze clinical and operational data, validate trends, and produce performance reports supporting quality improvement initiatives.
- Designed Charge Description Master (CDM) entries aligned with coding, reimbursement, and regulatory standards.
- Applied SEER abstraction standards to collect, validate, and report oncology registry data.
- Created plain-language patient education materials to improve health literacy and patient understanding.
- Developed and validated HIM exam-style assessment items using AI-assisted tools with source verification.
- Applied ICD-10-CM to HCC v.28 mapping and calculated RAF scores to quantify risk adjustment impact in healthcare value-based contracts.
